This book presents a comprehensive study of rolls in 4/4, 6/8, and cut time. Rolls are, by far, the greatest single problem faced by drummers; indeed many professionals as well as students never overcome the problem completely. But even as the technical aspect is being developed, there still exists the problem of reading rolls from written music. All exercises in this book are presented without dynamics. The primary aim is to develop facility for reading and playing rolls, and it was felt that the inclusion of dynamics in this study would to some degree detract from that goal. The tempos and methods are flexible to meet the needs of each student, and can be dictated by the teacher.
